25X1 5. [] Met with George Murphy, Joint Committee on Atomic Energy staff, and delivered to him NIE 11-2-62, "Soviet Atomic Energy Program" and NIE 13-2-62, "Chinese Communist Advanced Weapons Capabilities." In the course of general conversation, Murphy said he thought the Committee would like to have the Agency appear for the annual briefing of the Committee in the latter part of July but they had no specific date in mind as yet. I alerted Murphy to the fact that Mr. McCone might be out of the country sometime during this period. Murphy is to let us know when the Committee decides on a suggested date.

Talked briefly with John Conway, also of the Committee staff. He was unaware of the fact that I had just delivered NIE 11-2-62 and said they were interested in reports which they had received from the Navy (he believed from Admiral Dennison) to the effect that the Soviets were known to have Polaris-type submarines in the Pacific Ocean. I told Conway I was not aware of these reports but that I thought there was a section in NIE 11-2-62 on Soviet submarines. Conway said his question would probably be answered in the estimate. He will check it before making further inquiry.

25X1 6. [] Received a call from Senator Homer Capehart requesting I drop by and talk with him this morning at 9:45.

25X1 7. [] The Director appeared before the CIA Subcommittees of Senate Armed Services and Senate Appropriations Committees today at 2:30 p.m. See Memorandum for the Record.
